The Python and R distribution for scientific computing, called Anaconda, seeks to make package management and deployment easier. Data-science packages for Windows, Linux, and macOS are included in the release. It is created and managed by Anaconda, which was established in 2012 by Peter Wang and Travis Oliphant. While other products from the business are Anaconda Team Edition and Anaconda Enterprise Edition, both of which are not free, it is also known as Anaconda Distribution or Anaconda Individual Edition as an Anaconda.
